

MYO/PUNCH ROTATING SURGICAL PUNCH

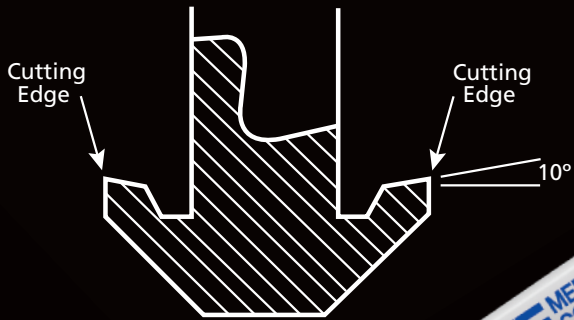

Designed to Cut a Clean and Round Hole

- Hollow cutting tip with 10 degree undercut moves tissue away from inside edge of hole during cut to provide a clean and round hole.
- Dual cutting action combined with a full 90 degree rotation of a scalpel sharp edge creates a clean circular hole.

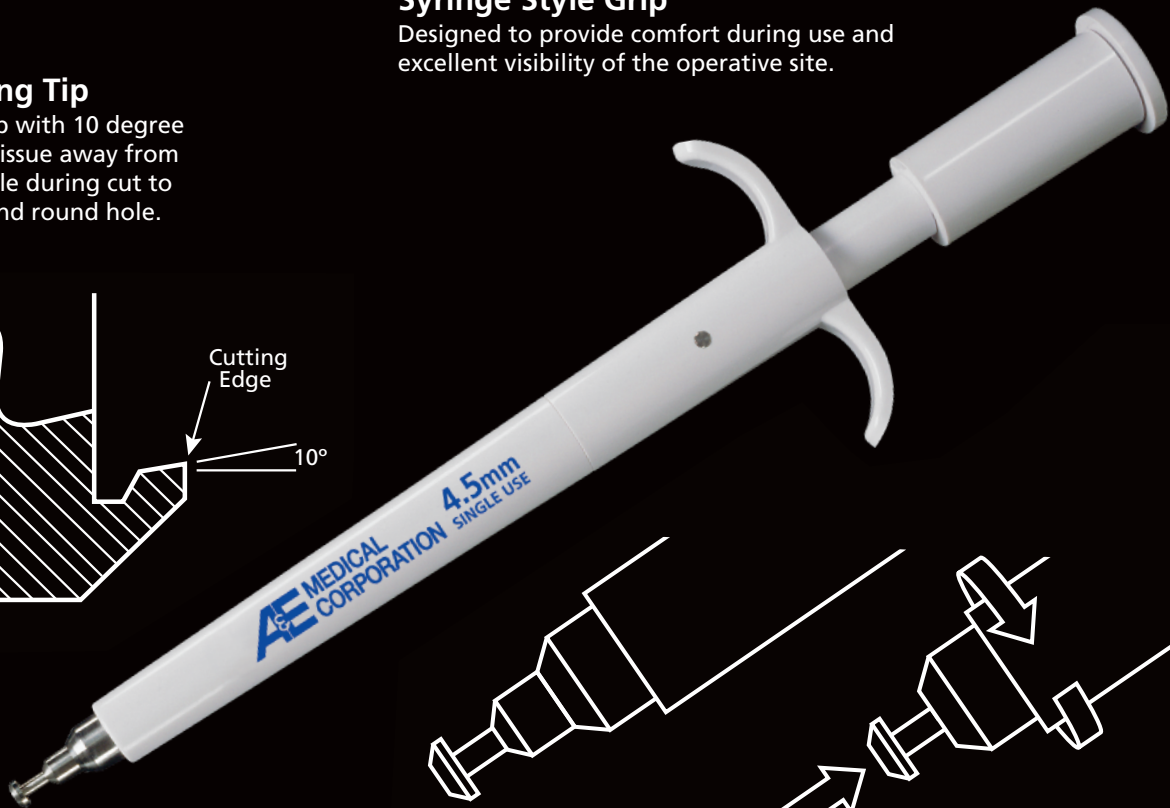

Hollow Cutting Tip

Hollow cutting tip with 10 degree undercut moves tissue away from inside edge of hole during cut to provide a clean and round hole.

Syringe Style Grip

Designed to provide comfort during use and excellent visibility of the operative site.

Low Profile Cutting Tip

Designed for easier entry.

Patented Rotating Cutting Action

Dual cutting action combined with a full 90 degree rotation of a scalpel sharp edge creates a clean circular hole.
