Titanium hemostatic clips **CLIP 9 VITALITEC®**

The reference clip

Pure titanium

- Biologically inert.
- Annealed to a consistent malleability.
- No shape memory for occlusive closure.
- Radio opaque.
- Non-magnetic for use with MRI or related scanning equipment.

The cartridge

Ease of loading

- Adhesive backing holds the cartridge securely on any surface.
- Soft loading of the clip due to the unique design of the cartridge.
- Number of clips per cartridge better suited for number of clips used per procedure.

6 sizes, 1 exclusive size, 7 colour codes

- Clips sizes adapted to perform hemostasis on various vessel configurations.

9 Clips/Cartridge for Micro thru Medium and 6 Clips/Cartridge for Medium/Large and Large

Internal structure

- Internal structure made up of small diamond shape with pyramidal heads.
- Interlocking atraumatic teeth designed for non-slip closure on the vessels.

Triangular shape wire

- The triangular shape of the titanium wire improves the precision of the positioning of the clip into the jaws of the applicator.

Apppliers: the perfect fit

- Open surgery range: Lengths of 15 cm, 20 cm, 28 cm and 28 cm angled models.
- Laparoscopic range: Lengths 33cm and 45cm. Ø 5mm, 10mm and 12mm.

- Maximum opening of the applicators for a full cleaning.
- Specific treatment of the inner surface of the jaws to secure the grip of the clip.

- Colour codes to fit all 7 available clips sizes.
