

# Dale® Stabilock Endotracheal Tube Holder

Features	Benefits	Clinical Advantages
<b>SOFT, COMFORTABLE BAND</b>	<ul style="list-style-type: none"> <li>• Fits endotracheal tube sizes 7.0-10.0mm</li> <li>• Convenient hook closures</li> </ul>	<ul style="list-style-type: none"> <li>• Easy to apply</li> <li>• Quick and easy to secure, reposition, and reapply</li> <li>• One size fits most adults</li> </ul>
<b>TUBE CHANNEL</b>	<ul style="list-style-type: none"> <li>• Helps prevent kinking or flattening of the tube</li> <li>• Offers maximum tube security</li> <li>• Supports the movement of the circuitry</li> <li>• Hospital available strong adhesive tape secures the tube in the tube channel</li> </ul>	<ul style="list-style-type: none"> <li>• Reduces possibility of airway obstruction</li> <li>• Minimizes ET tube movement</li> <li>• Prevents tracheal irritation</li> <li>• Helps prevent accidental dislodgement of ET tube</li> </ul>
<b>PROTECTIVE BARRIER WIPE</b>	<ul style="list-style-type: none"> <li>• Protects skin from Adhesive</li> <li>• Non-irritating to intact skin</li> <li>• Not made with natural rubber latex</li> </ul>	<ul style="list-style-type: none"> <li>• Barrier coating forms and bonds to skin</li> <li>• No need to search for other skin prep wipes</li> </ul>
<b>ADHESIVE BACKED BASE WITH HOOK STRIP</b>	<ul style="list-style-type: none"> <li>• Easy to reposition tube from corner to corner of mouth</li> <li>• Gentle on delicate skin</li> <li>• Adhesive is not affected by oily skin</li> <li>• Unlike hospital tape, will not leave sticky residue</li> <li>• Several application options based on patient needs</li> <li>• Can be left in place for up to 3 days</li> </ul>	<ul style="list-style-type: none"> <li>• Eliminates the trauma of repeated tape applications</li> <li>• Reduces need of skin irritating soaps for adhesive removal</li> <li>• Easy to apply, no need to search for other supplies</li> </ul>
<b>COMFORTABLE AND CONVENIENT</b>	<ul style="list-style-type: none"> <li>• Saves time required to reposition and secure ET tube</li> <li>• Easy to apply with gloves on</li> <li>• Can be used with or without bite block</li> <li>• Minimal obstruction of the mouth</li> </ul>	<ul style="list-style-type: none"> <li>• Allows for better oral care</li> <li>• Enhances recovery by assuring intact airway</li> <li>• Increases patient confidence and sense of security</li> </ul>
<b>NOT MADE WITH NATURAL RUBBER LATEX</b>	<ul style="list-style-type: none"> <li>• Eliminates patient and care-giver latex reactions</li> </ul>	<ul style="list-style-type: none"> <li>• Prevents latex hypersensitivity</li> </ul>

US Patent #8,096,300

- Dale recommends **repositioning the endotracheal tube often** to help prevent injury to the lips and underlying tissues due to unrelieved pressure.
- Dale strongly recommends **supporting the ventilator tubing** to reduce pressure on the endotracheal tube.
