

**WHEN YOU NEED
TO INTUBATE NOW.
NOT MINUTES
FROM NOW.**

The McGRATH™ MAC video laryngoscope —
within reach for every intubation

Medtronic
Further. Together

**ONE SYSTEM.
ALWAYS AVAILABLE.**

Searching for a video laryngoscope isn't an option when patients need to be intubated.

That's because your first attempt is your best attempt at successful intubation.¹

In your ORs, ICUs — even the fast-paced ER environment — McGRATH™ MAC video laryngoscopes offer:

single-button

ACCESS THAT'S AFFORDABLE

Traditional video laryngoscopes (VL) can be unwieldy and expensive — sometimes 10 times the cost of the McGRATH™ MAC video laryngoscope.⁴

Instead, the McGRATH™ MAC laryngoscope is portable and cost-effective, making critical VL technology accessible for any intubation.

**Prepare for the unexpected. Every time.
With McGRATH™ MAC video laryngoscopes.**

IMMEDIATE ACCESS AND TRAINING.

Society guidelines for unanticipated difficult intubations recommend that anesthesiologists are trained and can immediately access a video laryngoscope.¹

That's why we offer extensive training and education on McGRATH™ MAC video laryngoscopes.

See our online resources and instructional videos of proper technique with the McGRATH™ MAC video laryngoscope at:
