

CONFIDENCE FOR YOU. BENEFITS FOR PATIENTS.

Shiley™ Evac Endotracheal Tube with TaperGuard™ Cuff

The Shiley™ evac endotracheal tube incorporates the TaperGuard™ cuff, which reduces the risk of microaspiration¹ and ventilator associated pneumonia (VAP) by combining the TaperGuard™ cuff technology and the integrated subglottic secretion drainage port.²

The TaperGuard™ cuff significantly improves tracheal seal

Compared to the Shiley™ endotracheal tube with Hi-Lo™ barrel-shaped cuff.¹

The tapered shape reduces microaspiration by an average of 90%¹

Compared to the Shiley™ endotracheal tube with Hi-Lo™ barrel-shaped cuff.¹ This may reduce the risk of pulmonary complications associated with microaspiration.¹

Getting the pressure right

Taper-shaped cuffs can both enhance fit and reduce pressure on the trachea.^{3,4}

TaperGuard™ Cuff

Shiley™ Tracheal Tube
with Hi-Lo™ Cuff

UNIQUE DESIGN. UNIVERSAL SEAL.

The Shiley™ evac tube with TaperGuard™ cuff contains the latest generation of Shiley™ technology, which has been shown — when used in conjunction with a VAP bundle — to significantly reduce the incidence of VAP⁵.

The Shiley™ evac endotracheal tube with TaperGuard™ cuff
