

Available to VACUETTE® users

The VACUETTE® Training Resource

- The **VACUETTE®** Training Resource (VTR) is an on-screen digital training tool for all staff involved in venepuncture through to laboratory analysis
- It can be used for group and individual learning sessions, in conjunction with continued practice development
- Information is contained in digital pages linked together with hyperlinks to easily navigate between sections. Training videos and pdfs of informative booklets are also contained within the single DVD
- Sections include: Anatomy and Physiology, Practice Guidelines, Preanalytic Processes, Adult and Paediatric Blood Collection Procedures as well as urine sample collection using the **VACUETTE®** system
- Users can create presentations to suit their own working practices by selecting the parts most relevant to them. Certificates of course attendance can also be printed
- The VTR is fully endorsed by the National Association of Phlebotomists UK, and compliments the Government National Standards for Phlebotomy
