

# UVMATIC™

## Advance Air Purification System

The UVMATIC™ is the perfect solution to destroy bacteria and viruses in the air and on hard surfaces.

Feel safe and protected in a virus and bacteria free environment

### ADVANCED TECHNOLOGY

- Chemical Free
- Emits a stream of powerful natural disinfectants to destroy viruses on surfaces and in the air
- Low maintenance UVC bulb
- Simple, flexible mounting options
- Contributes to getting companies back to work
- UV-C light used in UVMATIC is all contained within the disinfection chamber of the unit and no light is emitted into the room

### BENEFITS

- Disinfects both the air and surfaces in the room
- Inactivates viruses and destroys bacteria
- Purifies the air and removes malodour
- Works on both hard and soft surfaces
- Effective on the surfaces of books, cushions, desks, chairs, storage boxes etc.
- Environmentally friendly chemical free disinfection
- Simple, powerful addition to a multi solution hygiene strategy
- Typical room size sanitised 5m2 up to 25m2 Per UVMatic

## The Technology

Completely automated and chemical free, the UVMATIC™ draws in the polluted air and treats it using UV light and photo catalytic oxidation. This results in the production of 3 powerful virus, bacteria and odour fighting ingredients:

- **Photoplasma:** eliminates bacterium viruses, mould and micro-organisms.
- **Ozone:** A highly reactive and energised oxygen, disinfects the air.
- **Negative Ions:** Increases the efficiency of the process, removing airborne impurities and dust.
