Medibender

A bending instrument for Mediplast Metal Suction Tips. Stainless Steel, non sterile, can be autoclaved.

How to use it:

1. Grip the instrument with the thumb on the Mediplast engraving and with the holes visible
2. Take the wanted size of metal suction tip
3. Put the metal suction tip through the appropriate sized hole
4. Bend the metal suction tip gently in the length direction of the instrument to the angle wanted

6061990011	Sject Flusher Syringe	20	40

Ward box = min qty / order

Trans- / Intratympanic Injection Needle

Specially designed needle for safer and easier transtympanic injections to the middle ear. The needle is 90 mm long and has a specially designed sharpened tip end which is 2 mm long and holds an outer diameter of only 0,4 mm.

The principle of "tube in tube" is used to create a natural stop against the tympanic membrane when injecting. Designed in association with Prof Måns Magnusson of the ENT clinic at Lund University Hospital.

- Single use, sterile, single packed in peel-pack

Art.No	Description	Ward box	Trsp.box
6066590	0,4 x 90 mm, lilac, luer-lock	10	900

Applicators

- Available in Aluminium or Steel
- Pure cotton end

*Manufacturer: Mediplast Srl / www.mediplast.com/IT - **Manufactured in Denmark
